

Vladimir Svidersky

Senior Engineering Manager

Head of Engineering for Data Leakage Prevention (scope: 30 engineers, 4 PMs, 3 designers)

tel: (425)-765-9380

mail: vladimir@svidersky.net

Summary

- Built and scaled 30-person multi-disciplinary org delivering enterprise DLP platform adopted by 1000+ large enterprise customers / \$2M monthly revenue
- Defined and executed multi-year Information Protection strategy within Atlassian Guard Premium.
- Led cross-craft and cross-org collaboration across Platform and Products groups.

Highlights

- 30+ engineers across geo-distributed teams
- Security, Identity, and Mobile platforms serving enterprise SaaS
- Multi-year roadmap ownership
- Executive stakeholder alignment
- Cross-functional leadership (PM, Design, Security, Legal)

Experience

October 2018 – Present

Atlassian ▪ Mountain View, CA

Senior Engineering Manager - Information Protection (2022 - Present)

Owned end-to-end engineering strategy for Atlassian's Data Loss Prevention platform within Guard Premium.

- Built, scaled and navigated through reorgs and times of ambiguities cross-functional org (30 engineers, 4 PMs, 3 designers).
- Defined 2-year technical roadmap across content scanning, data classification, detection, policy, and enforcement layers.
- Delivered GA launch at Team'24; now serving 1000+ enterprise customers.

Engineering Manager - Identity (2018 - 2022)

Leading multiple teams of 25+ engineers in Atlassian Identity. Responsible for Atlassian Mobile Enterprise Security offering and building new generation of Authorization platform.

- Led team that built new generation of Atlassian Authorization platform.
- Responsible for hiring, defining multi-quarter plans for several teams, growing leaders, performance review, establishing team culture across several diverse engineering teams.
- Led transition of all Atlassian mobile applications to OAuth 2.0.
- Led scale improvements that unlocked for 100k+ users organization adopting Atlassian products and automated user provisioning.
- Established and executed Atlassian Mobile Enterprise Security strategy by offering MDM support and creating Atlassian MAM (1.5year project, 350+ and growing happy Enterprise customers).

March 2014 – October 2018

Intapp ▪ Palo Alto, CA

Senior Development Manager - Mobile Platforms

Responsible for multiple engineering groups across the company, working on different enterprise mobile applications at the same time.

- Spearheaded transition to support Cloud backend for existing on-prem mobile application. Unified version was developed by two geographically separated teams and released to market after just 6 month of development.
- Identified architectural improvements resulting in increased developer efficiency, product reliability, and responsiveness to new feature requests.
- Worked closely with product and design groups to help define product vision and achieve consistency and brand recognition on different platforms.
- Led first major release of new generation of Mobile Time Management applications (OS/ Android/WinPhone and Blackberry10 platforms) to market within 9 months (multiple minor releases came on schedule in the next year).
- Hired and managed multiple development teams.
